

Design/Build Solutions for Aging and Accessibility (CAPS II)

Golden Opportunity

Instructor(s): Esther Greenhouse, CAPS, CGP

The maturing of the Baby Boomer population of the United States is a huge opportunity for remodelers. As this consumer group expands, more and more are interested in remodeling their homes to fit their new lifestyles and abilities. This Certified Aging-in-Place Specialist (CAPS) course will help you understand the guidelines and requirements of accessibility, the importance of doing an assessment with input from occupational and physical therapists as well as qualified health care professionals, and the significance of good design in making modifications that can transform a house into a safe, attractive, and comfortable home for life.

As a graduate of this course, you will be able to:

- Describe the home ownership market as it relates to the three segments of the Aging in Place market
- Consider contractual and legal concerns for building professionals providing design solutions to the Aging in Place client
- Perform a needs assessment of and recommend specific design solutions for the Aging in Place client
- Estimate and schedule the Aging in Place project while regarding special considerations
